- 5.) 1,000-word essay on the following subject:

Climate change is causing cities, counties, and the State of California to pursue aggressive new decarbonization policies. These include electrifying buildings, ports and transportation. In addition, the Governor recently outlined an aggressive plan to not only reduce California's demand for oil and gas, but also reduce production of oil and gas in California. Given that a significant amount of the work performed by the plumbers and pipefitters of the United Association in California is in the production of oil and gas, the distribution of natural gas, constructing gas piping systems in buildings, and the refining of crude oil, a move away from fossil fuels will have significant job impacts on the work of our members.

What strategies and public policy objectives should the UA in California pursue to mitigate these impacts and job losses? What new or emerging technologies provide the best work opportunities for the Pipe Trades? Outline both short and long-term strategies to be pursued by the Pipe Trades in dealing with the impacts of climate change and decarbonization. These should include public policy objectives to ensure a just transition for workers in the fossil fuel industry.

It is the responsibility of the applicant to see that all the above items are received on time at the following address:
